Customer Reviews

Guys this is not a good tool as I thought. I Got this in order to improve my knowledge and practice all the GMAT theory but 65% of these flash card are only a review of the first part of the book. Just to make it clear the first part of the book is about information about the test, kind of questions, times, blah blah blah So don't waist your time and make your own flash cards based on the theory from the book. Good luck!

I probably could have saved my money. Not really helpful on material like some of the practice books. Most of the cards ask about type of the questions on the test not really the material. If that

makes any sense. Not what I expected.

very basic overview of material, but NOT a good study tool for the deeper understand of how the GMAT actually asks questions.

Way to many flash cards on strategy. I can read about that. I don't need a flashcard for it.

Really not what I thought they were. I love Kaplan products....I thought these cards would assist me better with studying for GRE...they were ok

No holes on the cards, the material is just ok. I would not recommend it.

All the important information from the book in Flashcard form

Much smaller size cards than expected. Not evaluated Q&A yet
