Customer Reviews

The reviewer that put 5 stars, really said "HARD TO STUDY" So he made a mistake when he put 5 stars. And that is what I am emphasizing here "HARD TO STUDY" I am a math tutor in a college and I just cite a problem that starts with something like this "Let's throw 30 times two four sides dice..." "TWO FOUR SIDED DICE" ???? (Dice are little cubes with SIX sides!!!) And really they mean that. because the maximum sum you could have is 8. Why to use a never seen object in a beginner math book. ? There are many more examples difficult to grasp for a beginner. Also the explanations at the end of the book are difficult to follow for a beginner.

I gave it to our Spanish speaking student. I have not talked with him about the book

It came new and wrapped. I couldn't be happier. Thank you. My student will enjoy it.

A good helper easy to understand,

a lot of mistakes

Great thank you

It was good.

Excellent
