Customer Reviews

As someone who is working on components one and two this year, this book is a must-have for those needing some direction on where to start. It totally lays out where you need to start your journey, what needs to be focused on in both instruction and writing parts, and its format is easy to follow. This short, brief book is worth the \$18 and it presents the info in a way that is easy to go back and look for. Thank you Bobbie... please write a book for Components 3 and 4...

I was struggling on how to get started with writing Component 2 for my National Boards. This book helped me get a handle on the expectations and type of writing that was needed. I know I did much better due to using this book.

Great help for working on your national boards certification, very easy and quick read with lots of great tips.

Awesome book
